

HIV epidemic in Croatia

Josip Begovac
Nikolina Bogdanić

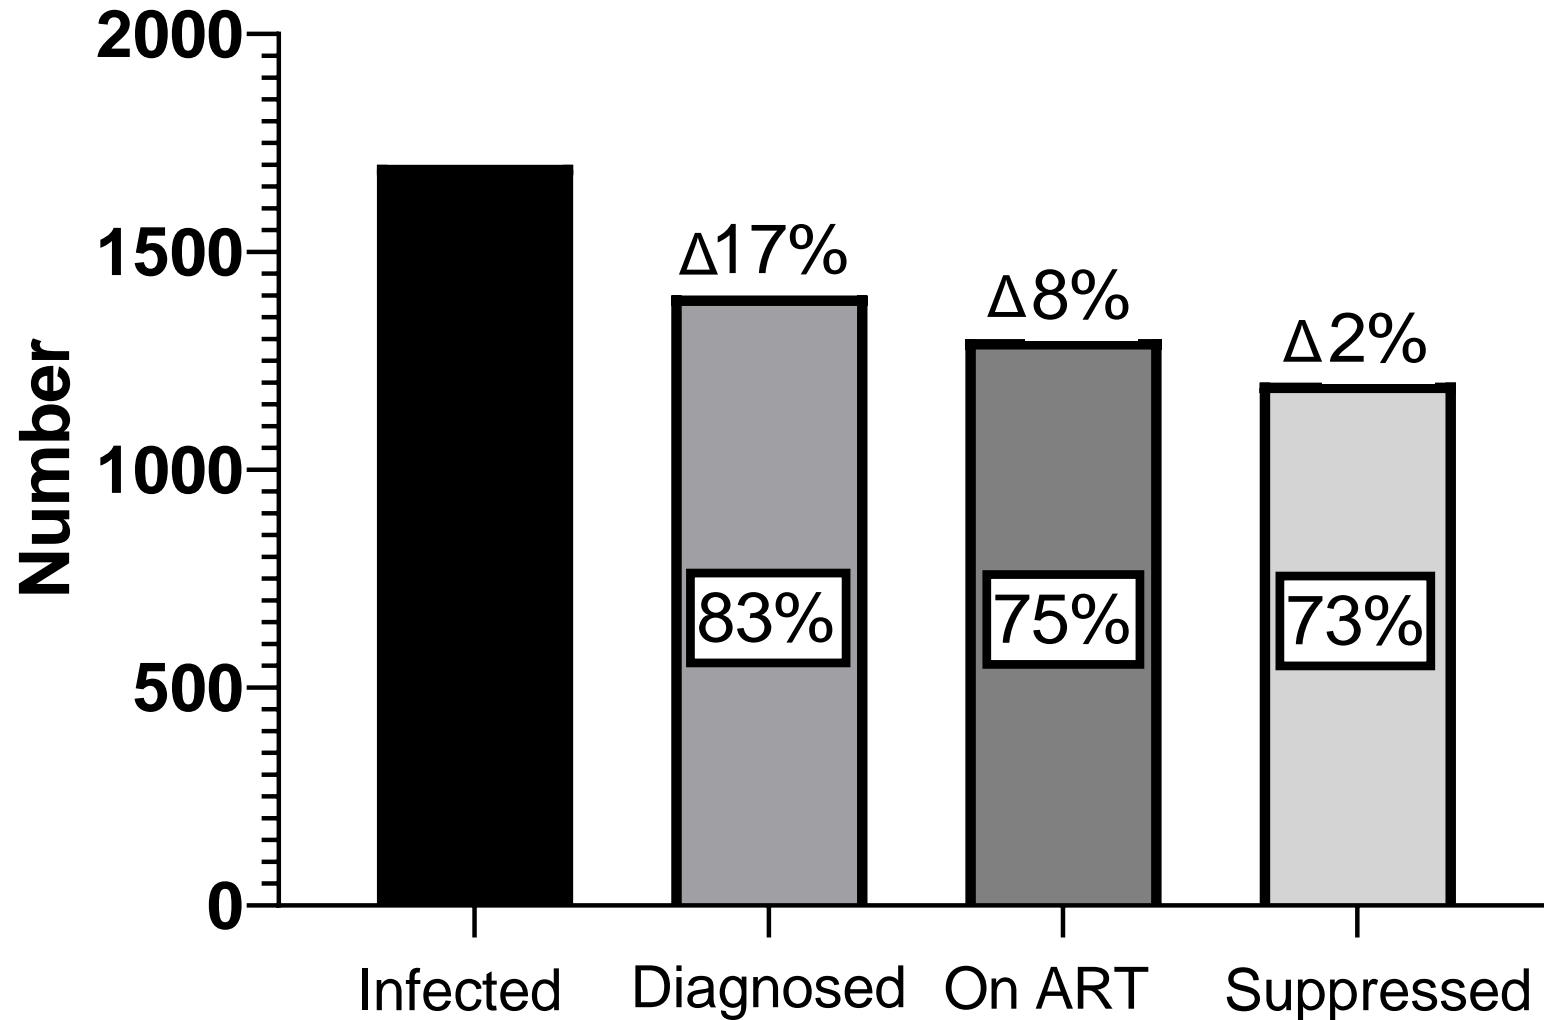

HIV care

- Croatia has a centralized system of care, all people living with HIV (PLWH) are treated at the University Hospital for Infectious Diseases in Zagreb
- Patients do not need referral from primary care physicians
- The hospital pharmacy dispenses ART for all PLWH and clinicians verify that the patient has the drugs before he/she leaves the hospital
- Patient information has been kept in an electronic database since 1997

Croatia 2020 - UNAIDS data

Adults and children living with HIV	1700 [1400 - 2000]
